The rotary dryer that is shown in these pictures I sent has been operating for quite some time, and is now the subject of a minor permit modification to allow its "installation." After ignoring numerous citizens' complaints about it and even denying its existence, the agency is now planning to permit it. But where is the NOV for operating it illegally? Where is the order of abatement? That the MCAQD is permitting it now while simply allowing it to operate is an admission that the rotary dryer requires a permit. So the MCAQD's failure to enforce is just another reason to remove the delegation agreement to MCAQD and/or overfile and penalize the company, at a minimum.

MCAQD is not responding to citizens complaints about this.
